

Summary of icons used for measuring technology

INFO

Thread angle			
IP protection class			
DIN standard constructional dimensions	 Accuracy and execution in accordance with company standard	 Accuracy and execution according to DIN	 Accuracy and execution similar to DIN
Gauge block standard	 Accuracy and execution according to DIN		
Tolerance standard			
Depth gauge	 Depth gauge round Ø 1.5 mm	 Standard depth gauge	
Material property	 Stainless steel	 All parts hardened	
	 Carbide-tipped measuring faces (Micrometers)	 Carbide-tipped measuring faces (Sliding callipers)	
Spindle pitch			
Function	 Run-out measurement		
Reading			
Unit			
Measuring system			
Packing, scope of delivery	 Stable box	 Plastic case	 Test certificate included
Data output format
